Web Development

We don't just build websites, we build websites that SELLS. Let us take you into a deeper experience, take a moment a lasting conveyable memory. Let us help build your tribe. Your website is the centre of your digital ecosystem, as a brick and mortar location. We Serve Responsive, Secured, Fast, Modern Websites.

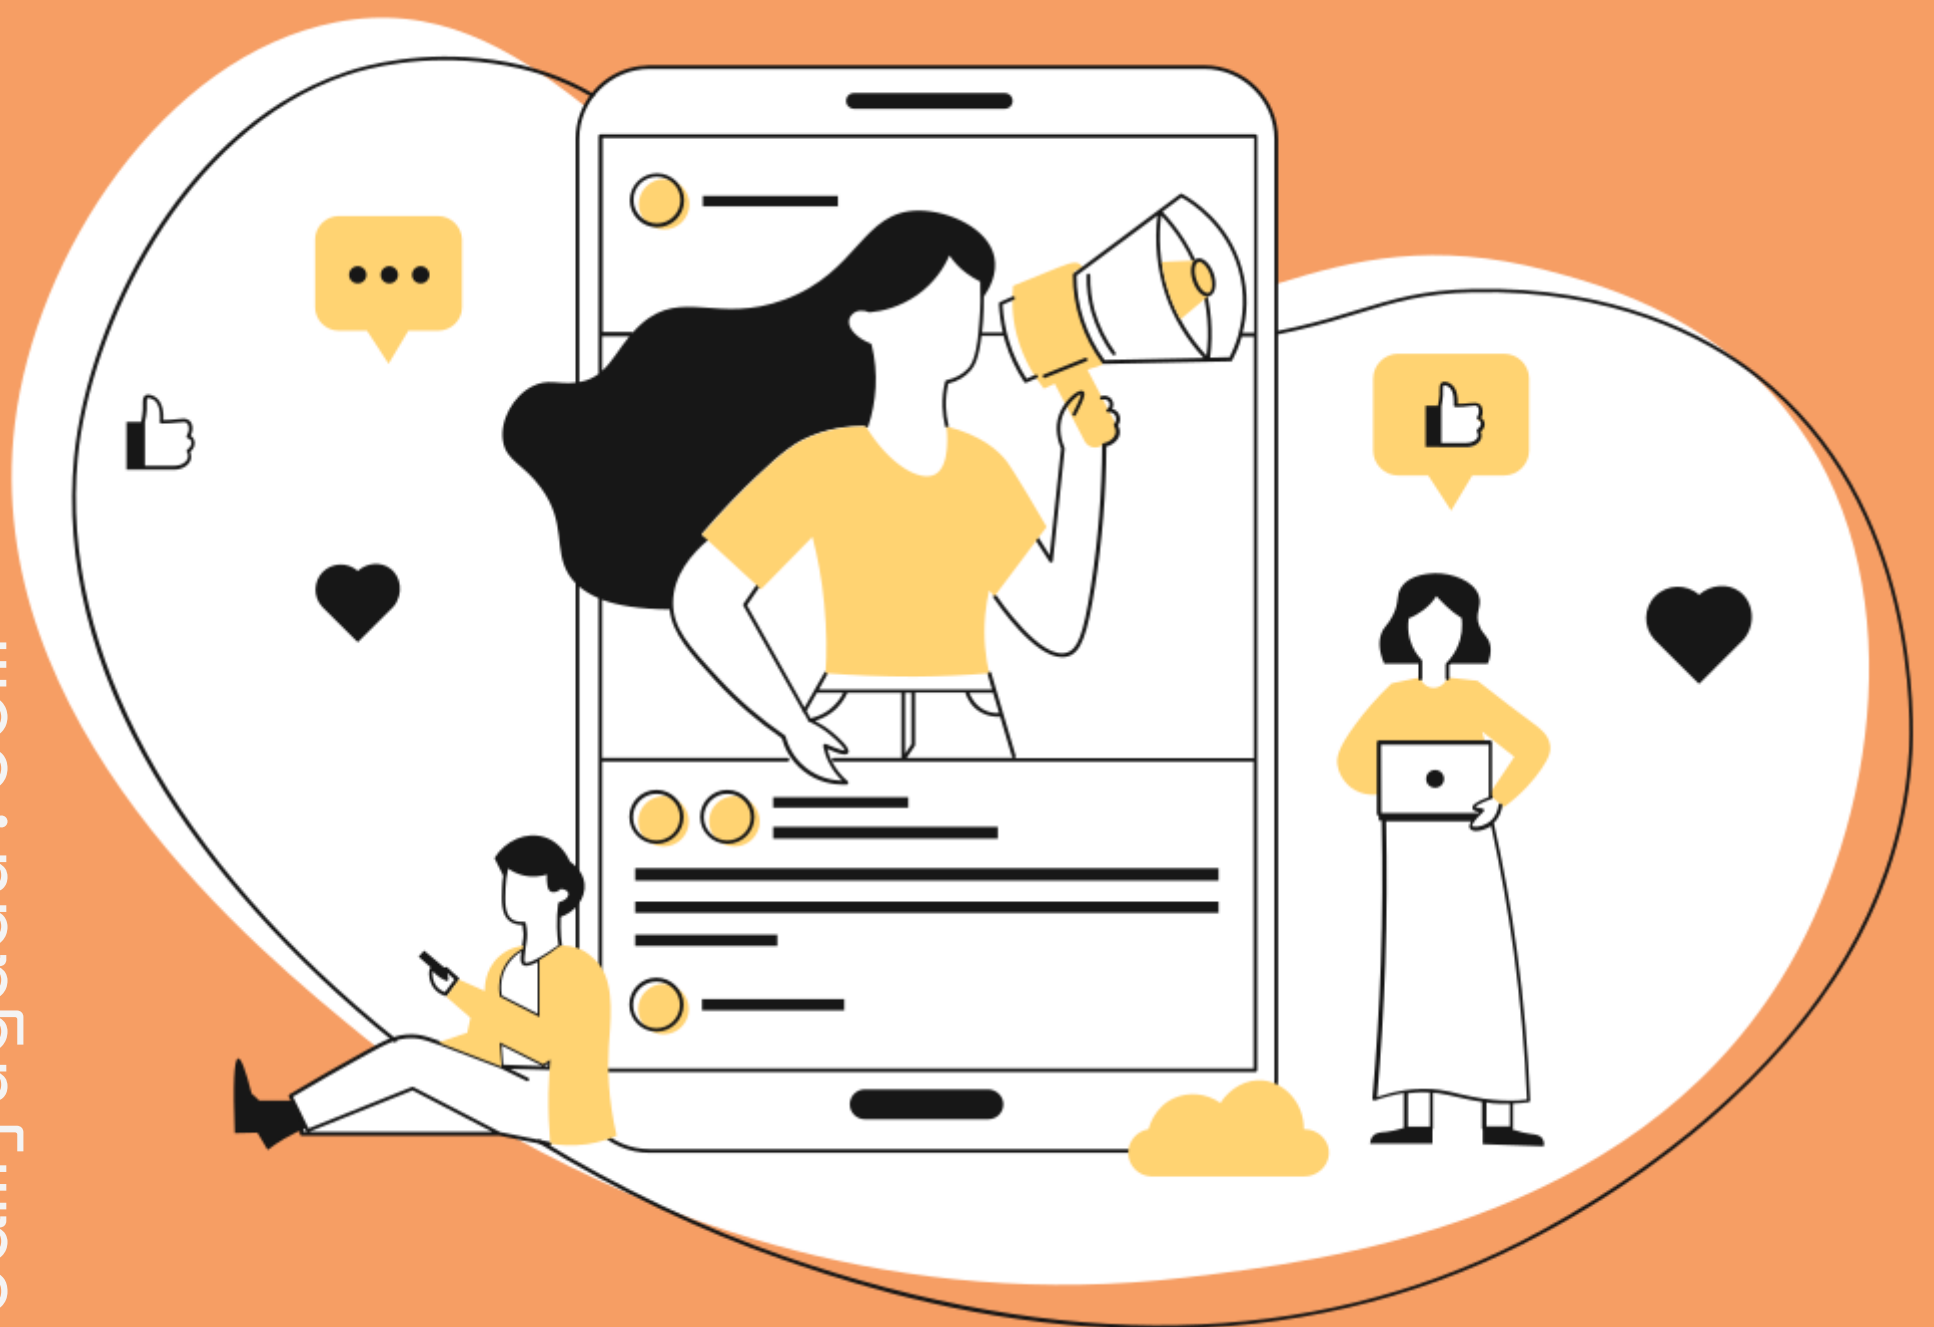

•SEO

- We help you beat competitors. Website without visitors is like a ship lost in the horizon. Boost your organic traffic with a top SEO agency in Delhi NCR. Push up your sales revenue with the best SEO services in India.

• Digital Marketing

• Boost visibility and get more customers through a customized digital marketing campaign for your business. Our services include , Visitor Analysis, SMO, PPC, Email & Affiliate Marketing, Targeted Audience, Google AdWords, Brand & Website Analysis.

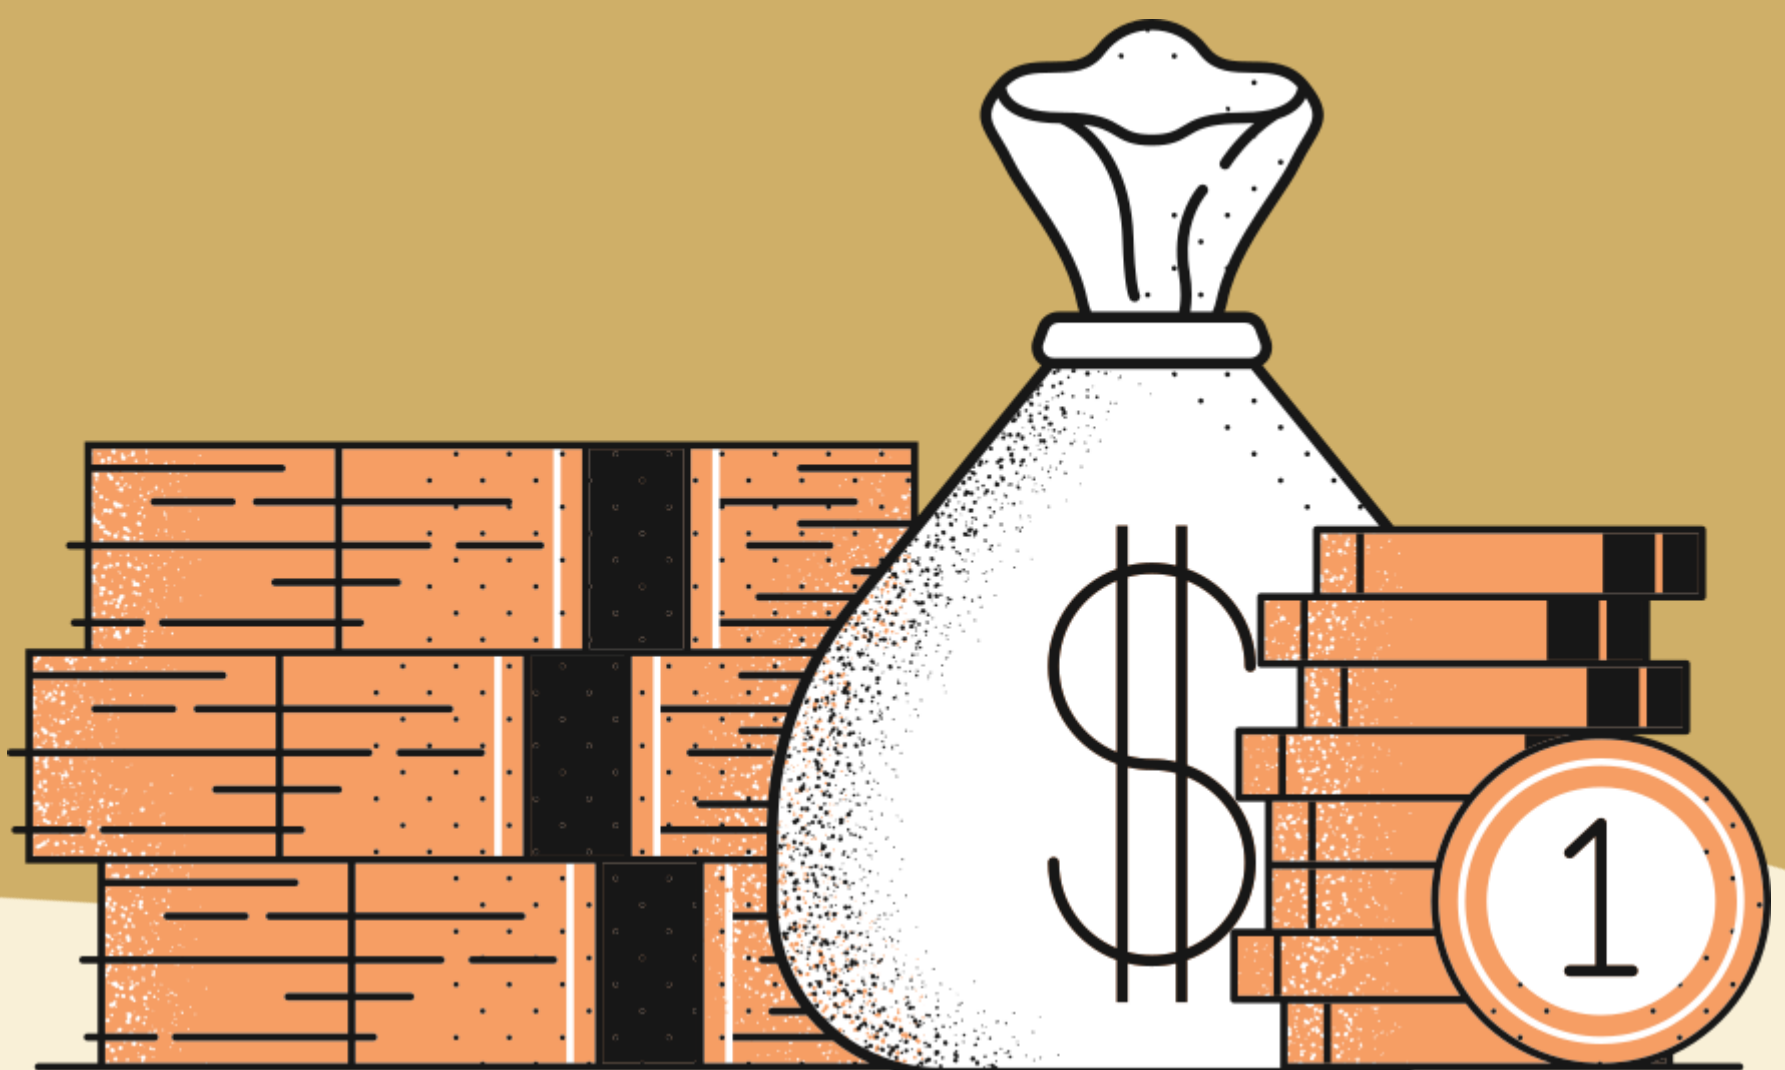

Social Media Marketing

We, as a social media agency plan & implement social media marketing strategy on the right channel which can be single or multiple as every channel is extremely helpful in their own right, draw different users and can lead to different marketing results. 92 % of the brands are marketing themselves on Facebook.

•Security

- Lack of awareness of the risks and consequences, and the belief especially amongst small business owners that they're too small to be noticed by hackers. They're not aware that most hackers use automated tools to find vulnerable sites. Most small business owners are too busy to think about security in any depth. We Provide – Red Team Sandbox Testing, Bug Fixing, Traffic Monitoring, XSS Protection, DDos, etc.

•Domain and Business Name Advisor

- Many business owners mistakenly think of a domain name as just an address for their website. But it's so much more than that. Your domain name is the face of your company—in the form of a URL. Therefore, you should make sure it sounds like a brand. The ideal domain name should give users a good idea of what your business is all about.

AMC

The logo graphic consists of a large red circle with a white square cutout on its right side. To the right of the circle is a red square with a white curved line along its right edge, resembling a quarter-circle or a stylized 'C'.

- Web Maintenance is an important aspect for sites to gain entry and maintain an effective online business. Our standard program includes, content updates, update images, and support via telephone and email.
- It also includes revising, editing, or otherwise changing existing web pages to keep your website up to date. Technology up gradation is a constantly happening process as it is important to be in-line with the changing demands.

•Consulting

•We help you with your transformation of industry-specific business processes in support of your digital and IT transformation. Web Consulting Services help companies to get their website evaluated for the aspects which need optimization. We Consult in. Website Structure and Type, SEO Techniques, Graphics Resolutions, Logo Classes, Right Media Platforms, Perfect Set for digital marketing, Domain and Hosting Suggestions, And our Powerful Area The Security Protocols or Your Website or applications, systems, logins, social accounts, etc.

Some Case Studies

Get full studies in our office.

•Why is website development important?

- Most small businesses don't have a website for what they do and how they do it. Do you know how much loss you bear if your business isn't online? Too much because almost everyone will look for you online first and talk about their needs rather than looking for you in a car?

- 9 out of 10 customers prefer to look for your business online.

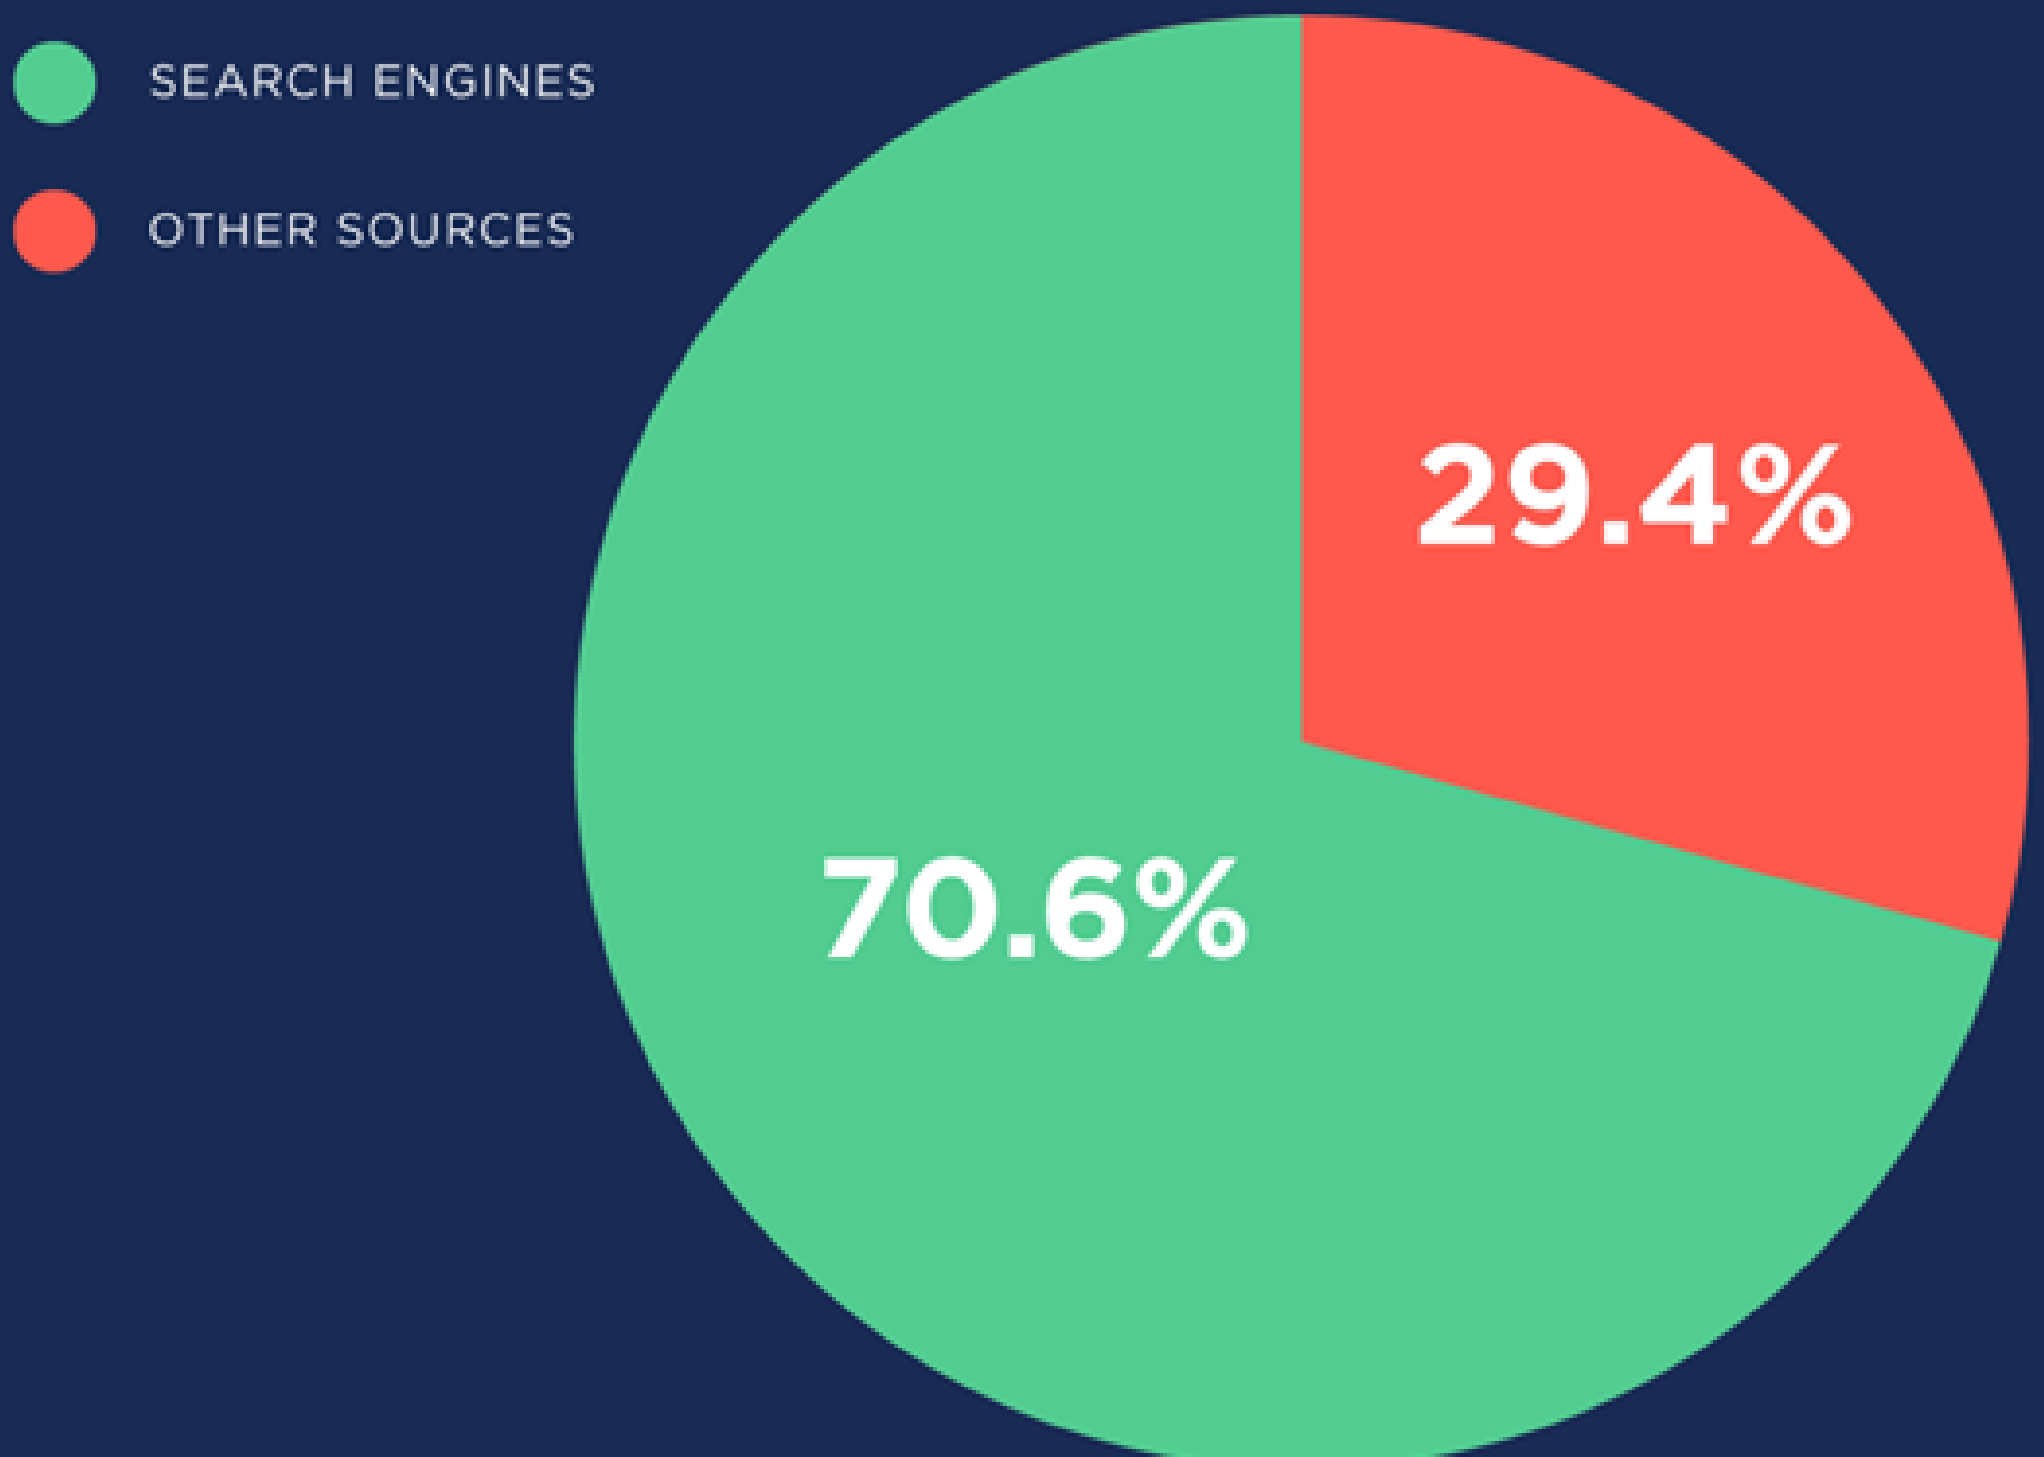

- Good websites are there but a great website is on top!

•Search engines as the platform for online presence and success

•There are 2.32 billion Facebook users. There are 1 billion Instagram users. But neither of these come close to the number of searches made each day.

Almost 3.5 billion searches are performed every day. The majority of all website traffic on the internet comes through search engines.

PROPORTIONS OF WEB TRAFFIC

- **43% of cyber attacks target small business**

- 64% of companies have experienced web-based attacks. 59% of companies experienced malicious code and botnets and 51% experienced denial of service attacks.

Thank You

Hope to see you at our office.
